

TORNADO

The most important actions you can take to stay safe and survive a tornado BEFORE it happens.

TORNADO: PLAN AHEAD & BE PREPARED

PREPARE NOW

- Immediately find a safe sturdy building, basement or small interior room.
- Stay away from windows, doors and outside walls (if possible).
- Use your arms to protect your head and neck.
- DO NOT go under overpass or bridge – you're safer in a low, flat location.
- Have your Bunker bag ready to go, including hand sanitizer, disposable masks, medical kit and disinfecting wipes to clean, disinfect, deodorize and remove allergens from surfaces.

SURVIVE DURING & AFTER

- Know your area's tornado risk. In the U.S., the Midwest and the Southeast have a greater risk for tornadoes.
- Know the signs of a tornado, including a rotating, funnel-shaped cloud; an approaching cloud of debris; or a loud roar—similar to a freight train.
- Sign up for your community's warning system
